

### **Delayed payment for Car chargers 6th Dec 2022**

If the owners of parking spaces No. 1 (house no. 25) and No. 5 (flat no 22) wish to have a car charger linked to the 3 phase EV supply, they must first pay the infrastructure cost, in addition to the cost of a charger. The cost of the infrastructure is £350 indexed by RPI from 6th December 2022.

All the other parking space owners have paid this infrastructure charge. They can, at their expense, install a car charger linked to the communal EV charging supply.

### Extract from minutes of RA meeting 6 Dec 2022

“Parking space owners who have not paid for EV Charger Infrastructure now will be able to install a charger on the Springhill Car Park System in the future after paying the Infrastructure Charge (currently £350), indexed up by the RPI calculated on a monthly basis from the time of this meeting.”
